

Introduction

Devices are being provided to the students at St John the Baptist, purchased by Auxiliary funds from Southwest Local School District, to enrich their learning opportunities and to give them experience with digital technologies that will be beneficial for high school, college and the workplace. Devices will be used during the school day, and students in grades 6, 7, & 8 (during the 2018-2019 school year) will take them home for academic purposes. Many benefits are expected, including use of digital textbooks, research and extended learning through internet resources, and use of [Google Apps for Education](#) for classroom collaboration.

Students are expected to care for these devices and use them properly as outlined in this acceptable usage policy. Parents and guardians share in the responsibility of taking care of the assigned device and monitoring its use. Physical damage to any device will result in the family paying for its repair if it is not covered beyond any applicable warranty. Unacceptable use of any device will result in penalties up to and including demerits, restriction of device privileges, suspension, expulsion and, if necessary, legal action. In particular, cyber-bullying of other students, faculty or staff will not be tolerated.

St John the Baptist School is providing devices and access to its computer network and the Internet for educational purposes only. If there is any doubt about whether a contemplated activity is educational, you should ask your teacher or principal if a use is appropriate.
